CORQUES LIQUID LINO

**CORQUES LIQUID LINO IS AN EXCELLENT CHOICE
FOR THOSE IN SEARCH OF A TOP-QUALITY FLOOR**

Quartzline Corques Liquid Lino is a beautiful and resilient floor that is applied in liquid form. It stands out from other flooring options due to its enduring resilience and natural aesthetic.

CORQUES LIQUID LINO

AN ATTRACTIVE, RESILIENT FLOORING SOLUTION

The composition of Corques Liquid Lino is a carefully balanced mix of predominantly natural materials, including plant-based linseed oil, wood, and cork powder.

The key benefits of this floor include its durability and excellent thermal conductivity, which enhance the efficiency of underfloor heating systems. As a poured system, it offers a seamless finish, eliminating the common issues of welding seams, lane plans, or cutting losses found in traditional floor coverings. Additionally, Corques Liquid Lino is available in a wide range of colors.

VERSATILE APPLICATIONS

Corques Liquid Lino is versatile and ideal for various settings, including educational institutions, medical facilities, offices, museums, and more. It's the perfect, seamless flooring solution for spaces where high standards of comfort, durability, impact resistance, and hygiene are essential.

DISTINCTIVE APPEARANCE

This flooring features a unique mottled look with a smooth surface. The natural composition of Corques Liquid Lino allows for subtle color variations, adding to its charm. It boasts a matte finish and is available in an extensive palette of standard colors, with custom options available to meet specific design needs.

ROBUST PROPERTIES

Corques Liquid Lino is renowned for its strength and wear resistance. Once fully cured, it is resistant to a broad spectrum of chemicals, acids, alkalis, resins, solvents, and food substances. Its seamless and liquid-tight nature, combined with the majority of its ingredients being recyclable, makes it an environmentally friendly choice. Free from plasticizers, Corques Liquid Lino is also easy to maintain and can be revitalized after years of use, offering long-term value.

CORQUES LIQUID LINO: EXCEPTIONALLY DURABLE AND ABRASION-RESISTANT

DURABILITY AND HARDNESS

Corques Liquid Lino becomes walkable just 24 hours after application. It reaches its optimal chemical and mechanical properties after a seven-day curing period at a minimum temperature of 15°C.

ENVIRONMENTAL CONSIDERATIONS

Crafted from renewable resources, Corques Liquid Lino is free from Red List ingredients and boasts a Declare Red List Free label. It's made without hazardous materials, contains no dangerous decomposition products or VOCs, and is EPD-certified. The use of natural ingredients also contributes positively to environmental sustainability.

EASY MAINTENANCE

Maintaining Corques Liquid Lino is straightforward: regular dusting with a Swiffer and, when necessary, wet cleaning with a neutral detergent. For detailed care instructions, refer to the Quartzline cleaning and maintenance guide.

HIGHLY DURABLE WITH EXCELLENT MECHANICAL PROPERTIES.

- Seamless and liquid-tight design.
