### STONE

#### QUARTZLINE STONE INDOOR

**STONE Indoor** brings a bold and dynamic look to your interior. this striking, robust floor is highly wear-resistant and can be customized with any possible color combination. It's also perfect for use with underfloor heating, ensuring both comfort and style. The **STONE Indoor metallic** adds an industrial touch to your interior and is highly resistant to sunlight (UV-resistant).

The floor is available with either an open or closed structure. For a closed structure, a layer of **Quartzline Topper 12** is applied making the floor exceptionally easy to maintain.

**STONE Indoor** is ideal for homes, offices, hospitality, healthcare, cultural, and recreational settings.

#### QUARTZLINE STONE OUTDOOR

**STONE Outdoor** is a polyurethane-bonded stone granule floor specifically designed for outdoor use. The use of a polyurethane binder allows **STONE Outdoor** to expand and contract, making it resistant to temperature fluctuations.

With its colored granules, stunning patterns can be created to enhance any outdoor space. Additionally, the floor is UV-resistant ensuring longevity. Binder's viscosity ensures sufficient adhesion to the substrate and bonding between the granules.

**STONE Outdoor** is ideal for balconies, patios, galleries, outdoor stairs, swimming pools surrounds, driveways and terraces.

## AVAILABLE IN VARIOUS GRAIN SIZES

Quartzline **STONE Indoor** and Quartzline **STONE Outdoor** are available in grain sizes; 1-2 mm, 2-3 mm and 3-4 mm. A mix of these grain sizes is, of course, possible. The granules are available in all colors, including some with a metallic finish. This metallic shine gives the floor an extra striking, industrial character.

### CLOSED AND OPEN STRUCTURE

**STONE Indoor** has a closed structure, while **STONE Outdoor** has an open structure. For **STONE Indoor**, an additional layer of **Quartzline Topper 12** ensures that the pores are sealed, preventing dirt from getting between the granules.

### EASY MAINTENANCE

Quartzline **STONE** floors are low maintenance. In **STONE** floors with a closed structure, the sealed surface prevents dirt from getting between the granules, making the floors easy to clean.

### OWN QUARRY

The granules are sourced from our own quarry in the Rhine River in Germany. The centuries of erosion in the riverbed, rounded these granules naturally. Once harvested, the granules are dried, sorted by size, and colored inside our factory in Dordrecht, The Netherlands.

### UV-RESISTANT

In **STONE Indoor**, the combination of the granules with **Quartzline Binder TP E30** offers excellent UV resistance. For **STONE Outdoor**, the **Quartzline Binder UV** ensures optimal protection against UV rays.
